**“** You are your greatest asset as a surgeon. Put your time, effort and money into laparoscopic training...  
*Dr. R. K. Mishra*

The New Techniques to Perform Laparoscopic Hernia Surgery webcast reviews techniques for preventing anastomotic leak in pelvic anastomosis in colorectal surgery and in bariatric surgery. Novel technologies aiming to reduce anastomotic leak will also be examined, including the evaluation of the study protocols and current results. Recent advances and future directions of medical care in gynaecological minimal

access surgery are discussed in the context of their potential impact and application for clinical practice. Expert speakers will present the most recent advances in the context of challenges faced by physicians and other health care providers caring for these patients.

As technology and the internet continues to grow, medical organisations and hospitals are now implementing online training tools within their clinical continues medical education practices to provide an interactive learning resource, that equips staff with the right knowledge and key skills they need to perform well in their role. This can lead to higher productivity levels and reduce the cost of waste within their busy practice time.

These activities are directed to practicing surgeons, gynaecologists, paediatric surgeon, urologists and other health practitioners who care for patients undergoing minimally invasive surgery. The World Laparoscopy Hospital Foundation Centre for Continuing Education is accredited by the Accreditation Council of World Association of Laparoscopic Surgeons for Continuing Medical Education to provide continuing medical education for minimal access Surgeons.

Candidates who have till date given examinations offline need to get themselves accustomed to the new online method of World Laparoscopy Hospital which is turning out to be the standard norm for taking examinations. There are major nationwide examinations that are being conducted online. Many surgeons and gynaecologist find it difficult to cope with the newly launched online method of examination. Hence, it is important to take them to a comfort level so that they don't get the additional

fear while giving the examination. Some of the steps mentioned below can help the candidates learn the exact methods to get thorough with online examination. These steps could well help candidates to deal with less clutter while beginning their examination.

Get your User Id and Password first to start [Laparoscopic Surgery Training](#): Upon successful registration the candidate would be provided with a unique User ID and Password which would help them to log in to the screen of the computer they would be in, while giving the examination. They could get the user id and password after filling the REGISTRATION FORM on exam portal page as well, which they need to use as their entry into the World Laparoscopy Hospital CME Exam Portal Gateway.

Mark your answers: You need to mark your answers by mouse click for every question. There would be multiple choices for all the questions. You need to select the answer and mouse click on the box of the answer. Upon clicking the box you need to click 'Save & Next' button to move to the next question.

As this online continued medical education and training is conducted through the web, it provides surgeons and gynaecologists with the flexibility to schedule training around their working hours or clinically free hours. The specialist can work on the skills they need to improve on to help them perform better in their role, without taking up time in the clinical practice.
